Capizzi C, Musso N, Barresi V, Condorelli DF

SNP array data and quantitative determination of cell fraction bearing Copy Neutral-LOH regions in tumoral samples

Colella R, Quinto V, Vaccina A, Scioscia G, Leo P

Renewing bioinformatics workflow system by using a Web 2.0 approach

D'Andrea D, Amato R, Pinelli M, Tagliaferri R, Cocozza S, Miele G

Challenging an ensemble approach (GENTES) with the Gene-Environment interaction Simulator (GENS)

Ceci M, Loglisci C, Salvemini E, Gallo G, D'Elia D, Malerba D

Mining spatial association rules of multiple co-occurring motifs to discover cis-regulatory modules

Di Filippo M, Traini A, D'Agostino N, Frusciante L, Chiusano ML

Revealing the chromosome organization of the emerging tomato genome.

Polyketide and non-ribosomal peptide synthetases in Aspergillus carbonarius genome: A strategy for identification of secondary metabolite clusters

Simone D, Calabrese FM, Mineccia G, Lang M, Gasparre G, Attimonelli M

The human NumtS revised compilation, RHNumtS: custom tracks, polymorphisms and validation by amplification and sequencing.

Lamontanara A, Vitulo N, Albiero A, Forcato C, Campagna D, Dal Pero F, Cattivelli L

The repetitive landscape of Wheat Chromosome 5A. A preliminary study based on low-coverage NGS technologies

Finding new genes for non-syndromic hearing loss through an in silico prioritization study

Masseroli M, Tagliasacchi M

Gene functional clustering for improved prediction of Gene Ontology annotations

Malovini A, Nuzzo A, Puca AA, Bellazzi R
Enabling a Multivariate Strategy for Genotyping Quality Control as a Grid Service

Functional and structural annotation of human protein variants originated from alternative splicing in human

Using Support Vector Machines to predict expression-purification success of recombinant integral membrane proteins

Iannelli G, Mangia A, Chiarappa P, Paradiso A, Tommasi S

aCGH Segmentation: analysis of a male breast cancer dataset

Vezzi F, Policriti A, Cattonaro F

Enhanced Reference Guided Assembly

Molecular Evolution and Comparative Genomics
Amato R, Pinelli M, Monticelli A, Mele G, Cocozza S

Genes involved in vitamin D pathway and schizophrenia show signature of latitude-dependent adaptation

Piredda R, Attimonelli M, Bellarosa R, Schirone B, Simeone MC

Prospects of barcoding the Italian wild dendroflora: lights and shadows

Balech B, Creanza TM, Di Tota F, Scioscia G, Leo P

A Bioinformatic Workflow for Grapevine Viral Diseases Analysis with Reference to Grapevine Leafroll Complex

Battagliero S, Puglia G, Vicario S, Rubino F, Scioscia G, Leo P

Efficient computation of a geodesic distance approximation in phylogenetic tree space

Calabrese F, Lang M, Simone D, Mineccia G, Piredda R, Gasparre G, Attimonelli M

Inter and intra species comparative analyses of RHNumtS sequences
Grillo G, Licciulli F, Catalano D

COSRaptor: a software for large-scale COS identification and polymorphic microsatellite

D'Antonio M, Ciccarelli FD

Evolution of protein interaction network properties of cancer genes

Di Micco P, Morea V

Molecular Biodiversity of the ferritin protein family

Towards Mobilome Inference in Yeast Genomes

Pappalardo AM, De Pinto V

Utility of Citochrome Oxidase I (COI) DNA Barcode in generating robust molecular
Pozzoli U, Fumagalli M, Cagliani R, Comi GP, Bresolin N, Clerici M, Sironi M

Traini A, D'Agostino N, Aversano M, Frusciante L, Chiusano ML

Linking the tomato and the potato genomes: the comparative season is now opened

Vicario S, Donvito G, Saccone C

Exploring the evolution of coding sequences in metazoan mtDNAs: effects of mutation and selection in

Miele M, Zappa A, Romano P

An effective Workflow for automated comparative analysis

Protein structure and function
Bianchi V, Gherardini PF, Helmer-Citterich M, Ausiello G

PDBinders: a new method for binding site prediction in protein structures

Schaerer MA, Gruetter MG, Capitani G

A novel indicator for distinguishing biologically relevant interfaces from crystal contacts

Cozzi P, Merelli I, D'Agostino D, Milanesi L

A parallel implementation of Genetic Algorithms for parameters estimation of Molecular Surfaces similarity analysis

Fabris F

SCOP protein families fingerprints

Lattanzi G, Giangreco I, Nicolotti O, Catto M, Carotti A

Alloxan derivatives as inhibitors of matrix metalloproteinase-2: theoretical calculations and experimental
Marabotti A, Scirè A, Staiano M, Iozzino L, Luchansky MS, Der BS, Dattelbaum JD, Tanfani F, D'Auria S

Computational and experimental approaches to characterize the molecular organization and structural stability of an Arginine-binding protein from Thermotoga maritima

Martin AJM, Pollastri G, Tosatto S

Ranking C
alpha traces with Neural Network Pairwise Interaction Fields

Miele M, Costantini S, Colonna G

Modelling of human adiponectin trimer and its complex with ADIPOR1 receptor: possible therapeutic targets

Palmeri A, Gherardini PF, Ausiello G, Späth GF, Zilberstein D, Helmer-Citterich M

Development of a Leishmania-specific phosphorylation sites predictor

Pandini A, Fornili A, Kleinjung J

A Structural Alphabet to study Protein Dynamics
Parca L, Gherardini PF, Helmer-Citterich M, Ausiello G

Phosphate-binding sites identification in unbound protein structures

Piano MA, Gerotto M, Tosatto S

Hepatitis C virus envelope glycoprotein E2: critical analysis of two proposed models

Potestio R, Pontiggia F, Micheletti C

PiSQRD: a novel variational scheme to identify dynamical domains in proteins

Walsh I, Tossato S, Pollastri G

Prediction and cleaning of ten residue-residue distance thresholds using machine learning.

Andrei RM, Zini MF, Callieri M, Lorj T, Maraziti G, Zoppè M

Fast elaboration of motion and intuitive visualization of surface properties of moving proteins

A Perl procedure for the analysis of phosphopeptide tandem mass spectra

Transcriptomics

Authors

Abstract

Title

Predictive transcriptomic analysis identified specific deregulated pathways before and after renal transplantation

Analysis of transcriptional and post-transcriptional regulatory networks

Bisognin A, Mazza E, Ferrari F, Forcato M, Bicciato S, Bortoluzzi S

Meta-analysis of microarray raw data using a virtual integrated platform

Catalano D, Finetti-Sialer MM
Submitted Abstracts

In-silico microRNAs analysis from Cartamus and Cynara spp. datasets

D’Agostino N, Cassandra R, Chiusano ML

Expressed Sequence Tags versus RNA-Seq. Methods and services for large-scale transcriptome analysis

Isella C, Renzulli T, Cora D, Medico E

MulCom: a multiple comparison statistical test for microarray data in Bioconductor

AMDA 2.10, an automated cross-platform pipeline for Affymetrix and illumina data analysis

Prediction of cellular developmental stage from whole-transcriptome expression profiles

Licciulli F, Caratozzolo MF, Cornacchia S, Chiumiento D, Mascoli M, Manzari C, Mignone F, Palusco AM

A bioinformatics workflow for the analysis of transcriptome data generated by deep-sequencing
Picardi E, Horner DS, Chiara M, Schiavon R, Valle G, Pesole G

Large scale detection and analysis of RNA editing in grape mtDNA by RNA deep-sequencing

Mining microarray data for inflammatory stimuli probes selection and classification

Piccolo V, Mica E, Pè E, Pesole G, Horner D

Definition plant microRNA primary transcripts and their splicing patterns using RNAseq

Metagenomics

Authors

Paoletti D, D'Antonio M, D'Onorio D, Castignanò T, Pesole G, Desideri A

Abstract

An optimized web server for metagenomics data analysis.
New tools for NGS

Cassandra R, D'Agostino N, Traini A, Chiusano ML

PolySite: A tool for searching polymorphic sites within sequences from RNA-Seq and Sanger technology

Beccuti M, Donatelli S, Calogero RA, Cordero F

DSgen: a tool to generate SOLiD and ILLUMINA synthetic NGS datasets to test mapping tools behavior

D'Onorio De Meo P, D'Antonio M, Castrignanò T, Zambelli F, Pavesi G, Pesole G

A web-based service for ChIP-Seq data analysis

Tulipano A, Navarro B, Di Serio F, Flores R, Gisel A

Sequence analysis of deep sequencing data of viroid-derived small RNAs in plants
Chiara M, Horner DS

Towards a novel method for small indels detection using Illumina/Solexa data.

Complete and comparative analysis of algorithms for whole genome shotgun assembly

Sana ME, Galasso M, Volinia S

GAMES: a new tool for genomic annotation of next generation sequencing data

Torrens F, Castellano G

Table of Periodic Properties of Human Immunodeficiency Virus Inhibitors

Caniato E, Vezzi A, Albiero A, Campagna D, Schiavon R, D’Ambrosio

De novo assembly combining SOLiD mate-pair and 454 data
Petrillo M, Cozzuto L, Paolella G

Scaffolder, a tool to detect and manage contig and scaffold relations in de novo high-throughput sequencing

Vicario S, Calabrese C, Simone D, Attimonelli M

Algorithms for tagging and recognizing a large set of samples in highly parallel 454 sequencing

**Systems Biology**

**Authors**

**Abstract Title**

Bosia C, Osella M, El Baroudi M, Corà D, Caselle M

Gene autoregulation via intronic microRNAs and its functions

Exact and inexact subgraph matching in large networks
El Baroudi M, Corà D, Bosia C, Osella M, Caselle M

A curated database of miRNA mediated Feed Forward Loops involving the MYC Transcription Factor as Master Regulator.

Galasso M, Sana ME, Volinia S

Reprogramming of miRNA networks in cancer and leukemia

Osella M, Bosia C, Corà D, Caselle M

The role of incoherent microRNA-mediated feedforward loops in noise buffering

Tieri P, Termanini A, de la Fuente A, Bellavista E, Salvioli S, Franceschi C

Reconstruction and analysis of the NF-kB pathway interactome
Bevilacqua V, Cucci F, Santarcangelo V, Mastronardi G

An ontological probabilistic approach to the breast cancer problem in semantic medicine

Corrada D, Battaglia C, Milanesi L

Integrated computational strategies for annotating microRNA target genes over genome-wide dataset

CDDM: Clinical database for data mining

Viral-KB: an integrated Knowledge-Base to support Viral molecular biodiversity studies

Mazzocco G, Righetto I, Bertoldo D, Bernante F, Filippini F

Towards NERVE 2.0: creation and integration of the NERVE database
Submitted Abstracts

Ghisalberti G, Masseroli M, Tettamanti L

Quality checking of data in biomolecular databases

Investigating the gene order variability and non-coding sequences of metazoan mitochondrial genomes

Lupi R, Gissi C

A combined approach for successful reannotation of animal mitochondrial tRNAs based on pattern-matching

The miRò project: towards a unified resource for miRNA research
Submitted Abstracts

Non syndromic Hereditary Hearing Loss (HHL) bioinformatic workbench

Social Database for Biodiversity

Moscatelli M, Bolzacchini E, D'Ursi P, Ferrero L, Gnocchi M, Lazzati Z, Orro A, Perrone MG, Milanesi L

Bioinformatics infrastructure for the analysis of the relationships between particulate matter and human health

Pappadà G, Santamaria M, Scioscia G, Quinto V

A system for barcode primer retrieval and evaluation

Peluso D, Cesareni G

Scholar Search: A global assessment of the productivity of Italian Universities

Picardi E, Regina TMR, Verbitskiy D, Brennicke A, Quagliariello C,
REDIdb: an upgraded bioinformatics resource for organelar RNA editing

Parodi S, Romano P

Recent activities of the Italian Network for Oncology Bioinformatics

Vaccina A, Alviggi C, Pivonello R, Colao A, Cariati F, Doronzo V, Leo P

Standard protocol definition for human oocytes selection based on morphological and structural data and
